

Sakthishwaran A

Associate Software Engineer

+91-9047401605 mail2sakthi18@gmail.com Coimbatore, India 2 Years of experience

Full Stack Developer with 2+ years of experience building scalable enterprise web applications using Angular, TypeScript, JavaScript, Node.js, and Hapi.js. Proven expertise in developing multi-tenant ERP and CRM solutions with REST API design, Role-Based Access Control (RBAC), JWT-based Authentication, and PostgreSQL/MySQL database optimization. Skilled in creating responsive UIs using HTML5, CSS3, Tailwind CSS, and Bootstrap, and integrating third-party services including Razorpay, Worldline, AWS S3, and Firebase Cloud Messaging. Experienced in Agile/Scrum methodologies, Git version control, and delivering secure, high-performance SDLC solutions across frontend and backend development.

KEY SKILLS

✓ Angular ✓ TypeScript ✓ JavaScript ✓ Node.js ✓ Hapi.js ✓ PHP Laravel ✓ Laravel ✓ SQL ✓ PostgreSQL

✓ MySQL ✓ SQL Server ✓ HTML5 ✓ CSS3 ✓ Tailwind CSS ✓ Bootstrap

WORK EXPERIENCE

Associate Software Engineer
SAARC Masts Tech Pvt Ltd

Aug 2025 - Jun 2026

- Developed and maintained a scalable multi-tenant School ERP system covering institution management, tenant management, fees management, communication, academics, and IAM modules to improve administrative efficiency across multiple institutions.
- Built responsive, mobile-first user interfaces using Angular, Angular CLI, TypeScript, and Tailwind CSS to enhance usability across desktop and mobile platforms.
- Designed and optimized RESTful APIs using Node.js and Hapi.js to enable seamless integration between frontend and backend and reduce API response times.
- Implemented secure JWT Authentication and Role-Based Access Control (RBAC) with tenant-specific data isolation to ensure data security and regulatory compliance.
- Integrated payment gateways such as Razorpay, and automated SMS, email, and WhatsApp notifications to streamline fee collection workflows.
- Designed and managed PostgreSQL database schemas and optimized complex SQL queries to improve application performance for large-scale educational data processing.
- Created dynamic dashboards and analytical reports to support academic and administrative decision-making.
- Collaborated in Agile/Scrum cross-functional teams following SDLC best practices to deliver secure, high-performance features on schedule.

Junior Software Engineer
SAARC Masts Tech Pvt Ltd

Apr 2024 - Aug 2025

- Developed and maintained College ERP modules including leave management, fee management, and attendance tracking using Laravel, PHP, JavaScript, and Bootstrap to support academic operations.
- Integrated Razorpay and Worldline payment gateways enabling secure online transactions, automated payment tracking, and digital receipt generation.
- Built CRM features including lead management, product catalogs, and dynamic data visualization dashboards to improve client handling efficiency.
- Configured AWS S3 for secure, scalable file storage with multi-disk configurations supporting public and private buckets.
- Implemented real-time push notifications using Firebase Cloud Messaging (FCM) to deliver multi-user alerts across the platform.
- Designed and optimized RESTful APIs supporting CRUD operations and third-party integrations.
- Enhanced frontend user experience through interactive UI components and dynamic content loading improving cross-browser compatibility.
- Managed database query optimization and performance tuning for large-scale report generation including chunked data exports to AWS S3.

PROJECTS

Multi-Tenant School ERP System

18 Months

- Architected and developed a full-stack multi-tenant ERP using Angular (frontend), Node.js + Hapi.js (backend), and PostgreSQL with secure RBAC and tenant-specific IAM.
- Implemented fees management with payment gateway integration and automated SMS/Email/WhatsApp communication workflows.
- Designed dynamic dashboards and reporting features to provide actionable administrative insights.
- Ensured tenant data isolation and improved administrative efficiency by enabling management of multiple institutions from a single platform.

College ERP & CRM Platform

20 Months

- Developed ERP and CRM modules using Laravel, PHP, JavaScript, and Bootstrap with Razorpay and Worldline payment integrations.
- Implemented AWS S3 storage for scalable file handling and FCM for real-time push notifications.
- Delivered CRM features including lead management and dynamic visual dashboards to streamline client workflows and payment tracking.

EDUCATION

B.Tech / B.E. | Computer Science and Engineering (CSE)

2023

Anna University

Grade - 8/10

EXTRA-CURRICULAR ACTIVITIES

Student Projects & Collaboration

Participated in end-to-end development of academic projects during engineering, collaborating on multi-module systems and implementing full-stack features using modern web technologies.

ACHIEVEMENTS

Productivity Improvements

Contributed to building multi-tenant ERP features that centralized management for multiple institutions, reducing administrative overhead.
